Omm Fire India Corporation – Organization profile

About us….

OMM FIRE INDIA CORPORATION wish to introduce ourselves one of the leading Fire & safety Company, having 15 years expertise with wide range of Products to Supply, Service & Support for all types of firefighting system, fire hydrant system, fire sprinkler system, fire alarm system (both addressable & conventional) & all kind of life safety devices

Apart from this we do train your people in the field of fire, Hydrant, sprinkler system, life safety devices like Self-contained breathing apparatus, portable - fixed gas detectors, and emergency rescue techniques

Also, we do support your operational team to maintain your firefighting system, life safety equipments operational by carrying out AMC /service at any point of time.

All our designs are comply with **TAC, NBC, FM, (Local & international guidelines)**

All the above products we supply will comply with **ISI, CE, UL, FM (Local & international approvals)**

We request you to kindly register our Company Name in yours Vendors list, refer our **Product details** list for procurements of Firefighting & Life Safety Devices. We assure you the best and prompt Services up to your satisfaction.

Thanking you and eagerly looking forward for your valuable Enquiry

For OMM FIRE INDIA CORPORATION

Authorized signatory

Fire Fighting System/Fire - Hydrant/Sprinkler system: -

We design, supply, erection, testing & Commissioning of an integrated Hydrant System as per national and international norms. We do selection of fire pump, size and arrangement of pipes used for hydrant system, pressure at hydrant point against the available fire risk. Our designed Hydrant System is an arrangement of piping, valves, hose connection and allied equipment installed in building and structure with connection located in such a manner that water can be discharge in stream of spray patterns through attached hose and nozzle for the purpose not only extinguish the fire but at the same time save the occupants and contents of area in with better response time.

We design the firefighting system as per TAC, NBC, and Indian, OISD and NFPA Standards / guideline.

Almost all part of the premises shall be covered by such system. Our designed system is not only complying the national and international norms/ guideline but also considered the exact requirement to minimize the cost at same time, increase the effectiveness of system for maximum gains.

We do supply I.S.I. marked Hydrant valves, Hoses, Coupling, Branch pipes. All types of special Nozzles, Hose Boxes, Hose Reel Drum, Water/ Foam monitor, A.F.F.F. Foam compound.

All types Hydrant hoses like, R.R.L., C.P., and Flexi line. Extra coat Pyrroline.

AMC for periodical maintenance for Fire Hydrant systems.

Fire Detection & Fire Alarm System: -

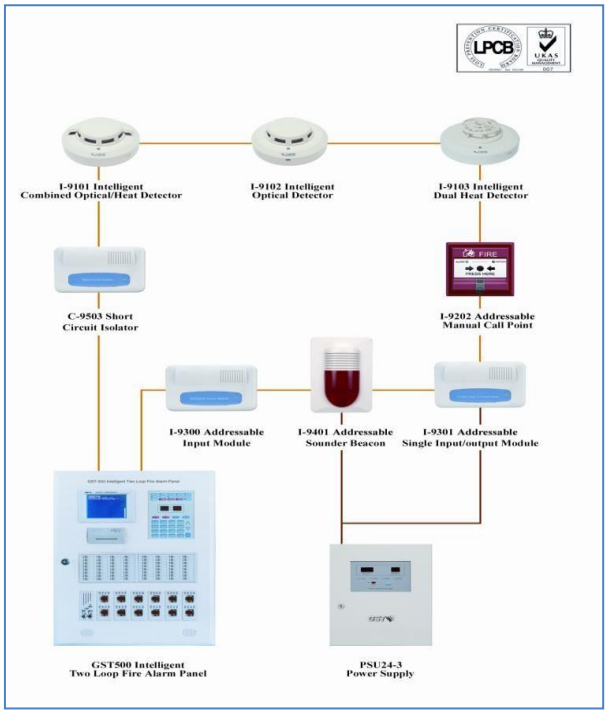
We have expertise in Design, supply, supply, erection, testing, commissioning of conventional as well as addressable fire alarm & fire detection systems. These fire detection and fire alarm systems are exclusively used in small, medium and large industrial and commercial buildings in this range; we offer addressable fire alarm system, conventional fire alarm system, safety fire alarm system and many more.

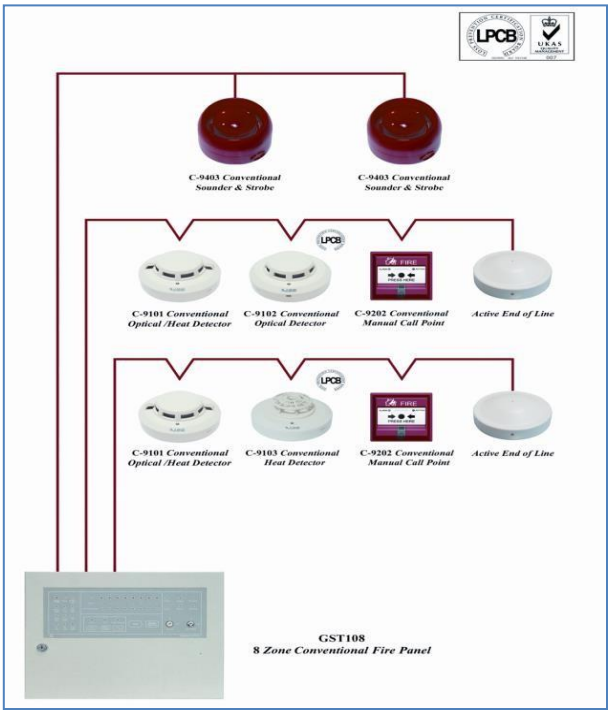
The range of Addressable fire alarm is very beneficial in detection and identifying the location of fire hazards. These systems are easy to maintain and can connect up to 200 devices to a single connection while minimizing wiring. Due to the cost-effective price, these firefighting systems can also be used in small scale industries

This range of conventional fire alarm systems incorporates the technology of microprocessor which reduces the sizes of the systems as well as enhances the capability of the systems. This equipment is very effective in detecting the location attacked by unpredicted fire and sending a cautionary alarm to the people. By detecting the increasing heat over the area these systems detect the presence of fires.

Various contents of the Addressable & conventional fire alarm system are: -

- Conventional MCP & Hooters (Sounder) Smoke/ Heat/ Multi Sensor
- Conventional Microprocessor based Fire Alarm control panel
- Conventional LPG leak detector/ Battery operated smoke detector
- Stand Alone MCP with HOOTER/STROBE
- Intelligent Addressable Fire Alarm Controller
- Intelligent smoke detector/Heat detector/Multi sensor/MCP
- Sounder/Strobe/Isolator/Control Module/LPG Detector/GUI)



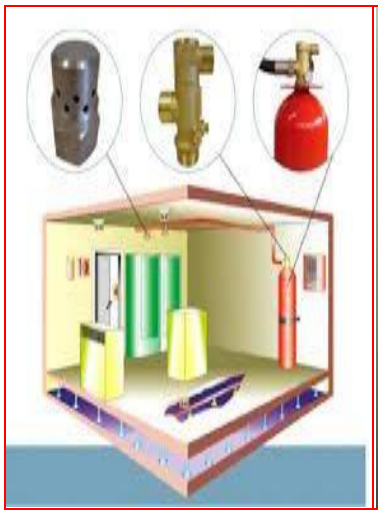


Fire Suppression System (Fm-200, Co2, Novak): -

We Do Design, Supply, Erection testing and commissioning of Fire Suppression system ie. CO2, FM-200, CL. AGENT & NOVEK system.

All types of Accessories for Fire Suppression systems

AMC for Fire Suppression system



Fire Extinguishers: -

Fire Extinguishers are act as First aid Fire appliances to fight the fire before its jump to UN control Stage. We Do Survey, Recommend, Supply & Installation of all types of fire extinguishers-15683 with I.S.I mark. As Per the IS: 2190 Indian STD.

Also, we do H.P Testing, Refilling & Servicing of all types of fire extinguishers, A.M.C for Periodical Maintenance of fire extinguisher as per IS: 2190 with Data Sheet Fire Audit for fire & safety Equipments

Life Safety devices: -

Golden Minutes: You have just 3 minutes to save life – In Emergency – Choose the best safety devices

Life safety devices used in Emergency situation like Firefighting, Rescue operations, Leak detection, Emergency Escape. It allows the people to work in a safe industrial environment and saves valuable lives &Asset.

Emergency Escape Breathing Apparatus (15/45 Minutes) Other Rescue Equipment's & Devices

Emergency Escape Rescue Mask/Hood/ Fire Men Suit

Handheld Gas Detectors & Fixed Gas Detector & Monitoring systems: -

Chemical Protective Suit (Disposable / Reusable)

Thermal imaging camera/ Waterjel Blankets/ Fire Blankets

AMC & Services: -

Importance of AMC: -

A service and maintenance contract could reduce risks of failure of equipment when the need arises - saving your investments and your business. Without service and maintenance even the best Fire Safety equipment & devices might fail to function when required during Emergency. Preventive maintenance visits will extend life of your equipment, due to which your organization will Compliance with local regulatory affairs and insurance requirements.

Omm Fire Solutions: -

- We offer a single maintenance contract for all the fire safety equipment/ systems installed in your premises –
- Portable fire extinguishers,
- Automatic Fire Alarm Systems,
- Water based Firefighting system,
- Gas based automatic flooding systems,
- Calibration of Gas detectors (Portable& Fixed gas Detectors),
- Self-contained breathing Apparatus (SCBA),
- Emergency Escape Breathing Apparatus-(15 Minutes),
- Refilling of SCBA Cylinders
- Calibration of Self-contained breathing Apparatus (SCBA),

There are clear advantages by going for a single contract. The most important is the peace of mind that will come when you know that there will be no gaps or overlaps in your fire/ Safety protection due to various agencies sharing different tasks.

Training On Fire & Safety: -

Basic Fire Safety

Fire is very good servant but very bad master

If Fire IS not controlled with in the first three minutes it turns out into a blaze and cause destruction to our Life, Property or lost. Property can be built back but life can't. Hence to save valuable human life one should know the basics of Fire Safety.

We **OMM FIRE** Train your People to fight the fire without fear through the Fire safety knowledge Both Theory & practical as per the New Std to handle the Fire Extinguisher to Extinguish the First stage Fire.

Advance Fire Safety-(Fire Hydrant, Firefighting & Fire Alarm)

A lot of money is spent on systems like smoke detectors, fire alarm panels, sprinkler systems, and hydrant systems. But during an emergency most often than not there are not enough trained people to use them. Thus, training on these systems and how to use them becomes mandatory. Fire extinguishers take care of only small fires and fire services take time to reach any place. If trained man power is available to use the hydrant system the fire can be fought till the time the fire service personnel reach the spot.

Omm fire Train your People with technical Knowledge Operational & Maintenance about all firefighting system & Fire alarm system. Also train them to Handling the firefighting system to fight the Major Fire & Rescue the people from the emergency and save the life & assets.

Basic Life support- (First Aid)

During any medical emergency it is very critical to save lives in the first 3 to 5 minutes. Many lives are lost due to wasting time waiting for the ambulance and other trained personnel. The golden hour if utilized properly can save a lot of life. Cardiac arrests, bleeding injuries, electrocution and drowning are some of the emergencies that are taking lives today. Omm fire Train your People with Basic first Aid Knowledge. Hence the need for training on Basic life Support and first aid skills to save precious lives.

Evacuation Mock Drill

A huge amount of money is spent on various fire protection systems in many places. But many a time when fire occurs many people lose their life. Sometimes systems fail and many a time employee are not trained on how to evacuate properly. Lives are lost mainly due to the fact that people do not know what to do and where to go. The evacuation Drills address the points of what to do and where to go.

Omm fire Train your ERT Members with technical Knowledge about all fire, first aid, Evacuation, Communication, Maintenance to do their responsibilities &fight the Major Fire, handle the Major Emergency& Rescue the people from the emergency and save the life & assets.

Occupational Health and Safety & SCBA and Rescue Training

Every human being in this world has to do an occupation for his livelihood. Each and every occupation comer with different hazards both manmade and natural. Productivity is affected whenever employees report sick or become injured. This not only affects the morale but also the health of the concerned employee. Lot of standards like NIOSH, OSHA prescribes standards in safety but these have to be communicated even to the basic level workmen. Hence the need to educate employees, not only on the standards, but also to inculcate a safety attitude in workers.

In any factory and high-rise buildings there are lot of areas where there are confined spaces. Spaces which have very little space to perform any work and also contain a lot of toxic gas and vapours which can take human life. Not only confined spaces but also during a Fire situation where there is a lot of smoke which not only takes life but also impedes rescue operations. In such times a lot of equipment's are in place but there is no awareness on how to use them. Rescue is also a critical element of life saving and if not rescued or carried properly further damage can happen to the injured casualty.

Omm fire Train your People with Importance of the safety, Hazard Identification, Importance of the PPE, Selection of proper PPE & Handle the PPE (SCBA, GAS DETECTORS, SAFETY DEVICES, SAFETY BELT, PPE, & OTHER SAFETY EQUIPMENTS)
